Claims 1-7 (as best understood) are rejected under 35 U.S.C. 103(a) as being unpatentable over Finnegan 4,832,208 in view of Horne 4,515,334. Finnegan teaches the device claimed including the ability to stack the racks one on top of the other. Absent is the specific showing of a wider area and a reduced area for specifically conforming to the shape of a bottle.

Horne specifically teaches a wider area and a more narrow area for the purpose of conforming to the shape of a wine bottle.

To adapt the Finnegan device with wider and more narrow sections to better conform to the specific shape of a wine bottle would have been obvious for one having ordinary skill in the art at the time of the invention.

All arguments and remarks submitted 10/26/07 have been carefully considered but are not deemed persuasive.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
